PROJECT:	
MODEL #:	
FIXTURE TYPE:	

HOUSING
Cold rolled steel, formed in a die, finished with an electroplated brushed nickel coating that will withstand most nicks and scratches.

DIFFUSER
Glass cylinder, white finished interior and etched exterior to disguise the light source. The cylinder is bonded with adhesive to a carbon steel threaded ring that screws into the cup holder for a secure installation.

ELECTRICAL
GU24 CFL, 2-prong Base 2700K lamp – 120V Electronic NPF Ballast
GU24 LED, 2-prong Base 3000K lamp - 120V - Lifetime Rating: 25,000 hours

Brownlee Lighting does not recommend GU24 base lamps for 24 hour operation due to lamp manufacturer specifications.

GU24 base compact fluorescent lamps used with an occupancy sensor may result in severely shortened lamp life and/or ballast damage.

MOUNTING
The 1482 series is designed to be mounted directly to a j-box (by others). Mounting hardware included. The LED version of this fixture is designed to mounted base down only.

FINISH
The standard finish is a sturdy electroplated brushed nickel. Options include all Brownlee paint finishes. Plated finishes such as Brushed Nickel are suitable for indoor applications only. Installation outdoors voids the Brownlee Limited Warranty.

WARRANTY
The housing features a 2 year warranty against a defect in workmanship. The lamps carry a limited warranty and claims of defective products should be addressed with the lamp manufacturer.
